--------	--------	-------

# INTERNATIONAL PRELIMINARY International application No. PCT/GB 03/03393 EXAMINATION REPORT - SEPARATE SHEET

#### Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Since claim 12 is directed to a method of treatment of the human or animal body by surgery, it relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. For the assessment of the subject-matter of present claim 12 on the question whether it is industrially applicable, no unified criteria exist in the PCT Contracting States. Therefore, no opinion will be formulated with respect to the subject-matter of claim 12 (Article 34(4)(a)(i) PCT).

### Re Item V

Reasoned statement under Rule 66.2(a)(ii) PCT with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document (D1) cited in the International search report:

D1 ... US 5,108,413 A (Moyers R.E.)

Document D1 discloses (cf. claims 1, 2, 10, 11) a dilator for opening the lumen of a tubular organ comprising an elongated flexible expansion member of a material having a negative Poisson ratio. The subject-matter of claims 1-11 of the present application differs from the disclosure of D1 in that both ends of the tubular liner are open and is therefore novel according to Article 33(2) PCT.

Document D1, which is considered the most relevant state of the art, discloses (cf. col. 1, lines 43-45; claims 1, 2, 10, 11) a dilator for opening the lumen of a tubular body organ comprising an elongated flexible expansion member of a material having a negative Poisson ratio to obtain a known and controllable radial expansion.

In view of D1, the objective technical problem underlying the present application is considered to provide devices for lining *in vivo* ducts which allow for a known and controllable radial expansion.

# INTERNATIONAL PRELIMINARY International application No. PCT/GB 03/03393 EXAMINATION REPORT - SEPARATE SHEET

The solution is a tubular liner for insertion into an *in vivo* duct with two open ends to allow for fluid flow through the liner comprising an auxetic material.

The subject-matter of claims 1-11 of the present application is not limited to implantable or biocompatible liners. According to the Applicant, there is no reason why the teaching of this document should be limited to *in vivo* ducts.

According to the preliminary examination authority, the limitation to *in vivo* ducts is essential. The application does not contain any mention of other types of ducts and it is not apparent how the application of the tubular liner to other types of ducts would be useful.

Therefore, the objective technical problem has been defined above as to provide devices for lining <u>in vivo</u> ducts <u>so</u> that the technical problem is not solved over the <u>whole</u> scope of the claims.

Since this objective technical problem is not solved over the whole scope of the claims, the subject-matter of claims 1-11 cannot be considered to involve an inventive activity according to Article 33(3) PCT.

The subject-matter of claims 1-11 of the present application fulfils the requirements of Article 33(4) PCT concerning the industrial applicability.

## WRITTEN OPINION

III	. No	r-establishment of opinion with regard to novelty, inventive step and industrial applicability
1.	The	questions whether the claimed invention appears to be novel, to involve a r inventive step (to be non-ious), or to be industrially applicable have not been and will not be examined in respect of:
		the entire international application,
	Ø	claims Nos. 12
		because:
	Ø	the said international application, or the said claims Nos. 12 relate to the following subject matter which does not require an international preliminary examination (specify):
		see separate sheet
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.
		no international search report has been established for the said claims Nc s.
2.		ritten opinion cannot be drawn due to the failure of the nucleotide and/or a nino acid sequence listing to ply with the Standard provided for in Annex C of the Administrative Instructions:
		the written form has not been furnished or does not comply with the Stant ard.
		the computer readable form has not been furnished or does not comply with the Standard.
۲.	Rea app	soned statement under Rule 66.2(a)(ii) with regard to novelty, inventi /e step or industrial licability; citations and explanations supporting such statement
	Stat	ement
	Nov	elty (N) Claims 1 (no), 2-11 (yes)
	Inve	ntive step (IS) Claims 1-11 (no)
	Indu	strial applicability (IA) Claims 1-11 (yes)
	Citat	ions and explanations

#### Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Since claim 12 is directed to a method of treatment of the human or animal body by surgery, it relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. For the assessment of the subject-matter of present claim 12 on the question whether it is industrially applicable, no unified criteria exist in the PCT Contracting States. Therefore, no opinion will be formulated with respect to the subject-matter of claim 12 (Article 34(4)(a)(i) PCT).

#### Re\_Item V

Reasoned statement under Rule 66.2(a)(ii) PCT with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document (D1) cited in the In: ernational search report:

D1 ... US 5,108,413 A (Moyers R.E.)

Document D1 discloses (cf. claims 1, 2, 10, 11) a dilator for open ng the lumen of a tubular organ comprising an elongated flexible expansion member of a material having a negative Poisson ratio. This disclosure is novelty-destroying for the subject-matter of claim 1 of the present application according to Article 33(2) PCT.

Document D1, which is considered the most relevant state of the art, discloses (cf. col. 1, lines 43-45; claims 1, 2, 10, 11) a dilator for opening the lume 1 of a tubular body organ comprising an elongated flexible expansion member of a niaterial having a negative Poisson ratio to obtain a known and controllable radial expansion.

Thus, D1 not only addresses the same technical problem as the present application, i.e. to obtain a known and controllable radial expansion, but also provides the same solution, i.e. a tubular liner comprising an auxetic material.

12-01-2004 08:10

Date: 7/12/2004 8:09:57 AM

3 5 0000000 -

WRITTEN OPINION SEPARATE SHEET

International application Vo. PCT/GB03/03393

Furthermore, the subject-matter of claims 1-11 of the present apr lication is not limited to implants or biocompatible liners, so that the technical problem is not solved over the whole scope of the claims.

Therefore, the subject-matter of claims 1-11 is not considered to involve an inventive activity according to Article 33(3) PCT.
